

Workshop checklist

PORTAL	omniagent-solutioning.purpleforest-94680dfb.southeastasia.azurecontainerapps.io	ACCESS Use the internal facilitator handoff.
--------	---	---

BEFORE Set up and test 1. Create the workshop link. 2. Add the objective, shared context and real sponsor constraints. 3. Leave the product portfolio wide unless the sponsor has narrowed it. 4. Set a separate workshop password. Participant link to the room; owner link stays with you. 5. Dry-run the participant link in a private window before anyone joins.	DURING · 60–90 MIN Move from outcome to decision 0–10 Whose work changes? What result matters? 10–25 Map steps, systems, information and hand-offs. 25–40 Set automation, approval and ownership boundaries. 40–55 One use case per participant or team. 55–75 Review paths in the owner dashboard. 75–90 Choose validation candidates and name owners.	AFTER Close with owners and tests • Review the full intake and technical recommendation. • Confirm the path or record a revision. • Name a business owner for each pilot. • Record open data, identity and approval questions. • Agree the smallest test and success threshold. • Export the workshop portfolio.
---	---	--

What each role sees

Participant

Recommended path: where, why, MVP and how to start.
The pilot plan is optional.

Workshop owner

Private architecture, AIDF, authority, risks, alternatives, prerequisites and evidence. Participants cannot open it.

Current field limits

No direct Mural URL import. Consolidate the relevant notes and paste the text into Free-form.

No board screenshot upload. The field portal has no image-upload control.

A fixed workflow may be the right answer. Verify licensing, connectors, identity, permissions and preview status before build.
